## ENGINEERING FOR NONWOVENS

### PRESS RELEASE

February 08  
aw

#### DiloGroup exhibits at INDEX 08 Booth No. 2010

From April 15 to 18 INDEX will take place in Geneva as a forum for the nonwovens industry. At this show nonwovens producers, raw material suppliers and machine manufacturers come together. On floor space in excess of 20.000 m<sup>2</sup> more than 400 exhibitors will offer their services and products.

Participating at the INDEX show is a tradition for the DiloGroup. On a booth of more than 100 m<sup>2</sup> the companies of the DiloGroup – DiloTemafa, DiloSpinnbau and DiloMachines – will provide widespread information about numerous applications of nonwovens showing various products. Our experts will be available to hold technical discussions with you.

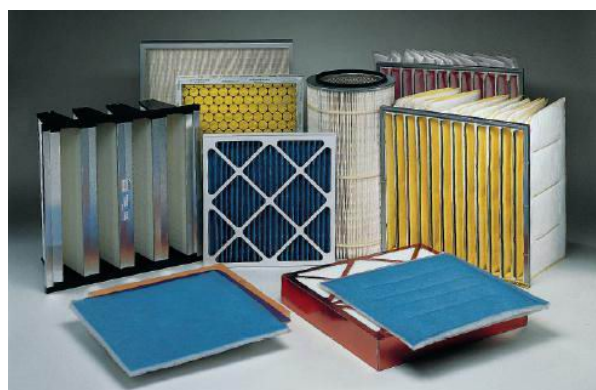

Bank reinforcement with geotextile

Wipes for household and industry

Automotive head liner

Various filters

Trainers made from synthetic leather

Plant pot made of natural fibres

We project lines for the production of different nonwovens in all application areas and offer them as turnkey installations. Either domestic or technical textiles can be produced. Possible application areas are floor coverings, automotive linings, geotextiles, filter media, synthetic leather or natural fibre felts. Furthermore we offer installations for the production of disposables which are used in cosmetics, medicine and hygiene.

Surgical masks and covers

Diapers

DiloGroup has already delivered more than 160 complete production lines to the nonwovens industry and thus has the necessary know-how to design the optimum installation for the desired final product. Continuous product development and application research work in our textile centres support and ensure sustainable production lines. Being a strong partner for the nonwovens industry we achieve maximum throughput of the projected installations with highest machine efficiency and product quality. The excellent quality of our worldwide service is well-known.

Visit us on our booth No. 2010. We look forward to interesting discussions with you.
